Sec. 4. (a) Whenever any meter is tested, a record shall be preserved containing:

- (1) the information necessary for identifying that particular meter;
- (2) the reason for making the test;
- (3) the reading of the meter before the test;

 - (C) record of the last test to which the meter was subjected, including:
 - (i) the dates; and
 - (ii) general results;

of the test.

These requirements apply to all meters purchased after the effective date of these rules and to all other meters insofar as the information is available. To the extent practicable, utilities are encouraged to keep such records in a searchable electronic format.

(c) If required by the commission, annual tabulations of the results of all meter tests shall be made, arranged according to types and sizes of meters and intervals of tests or as the commission may request. *(Indiana Utility Regulatory Commission; No. 34805: Standards of Service For Water Utilities Rule 4; filed Nov 28, 1977, 3:00 p.m.: Rules and Regs. 1978, p. 679; readopted filed Jul 11, 2001, 4:30 p.m.: 24 IR 4233; readopted filed Apr 24, 2007, 8:21 a.m.: 20070509-IR-170070147RFA; filed Dec 15, 2008, 11:46 a.m.: 20090114-IR-170080315FRA; readopted filed Aug 2, 2013, 2:16 p.m.: 20130828-IR-170130227RFA; readopted filed Apr 11, 2019, 9:04 a.m.: 20190508-IR-170190136RFA)*

170 IAC 6-1-5 Location of meters

Authority: IC 8-1-1-3; IC 8-1-2-4
Affected: IC 8-1-2-34; IC 8-1-2-35

Sec. 5. (a) The location of meters may be determined by the utility pursuant to the utility's rules and specifications.

(b) The meter may be located:

- (1) in an outdoor pit;
- (2) inside the building or premises of the customer being served; or
- (3) in a standardized location pursuant to:
 - (A) utility rules; or
 - (B) local ordinance.

(c) When the meter is to be installed in an underground pit, the pit shall be located in a convenient and readily accessible location. Upon request by the customer before the installation is made, the pit will be located at the point requested, if feasible under proper utility standards. The pit must be constructed to protect the meter from freezing and damage by vehicular traffic. The pit location and design should prevent, as far as possible, the inflow of surface water.

(d) Meters installed in underground pits, to the extent practical, shall not be installed where they are likely to sustain damage due to being struck or crushed, as in driveways, parking lots, etc. When this is not possible, heavy duty tile, ring, and lid assemblies shall be used to protect the installation and adjoining service or main, or both.

(e) When, following the installation of an underground pit by the utility, a customer causes damage due to changes in property usage to:

- (1) the underground pit;
- (2) adjoining service;
- (3) the water main; or
- (4) any combination of the facilities listed in subdivisions (1) through (3);

the customer shall be responsible for the payment of necessary repairs to the damaged facilities.

(f) If the customer wishes to change the location of a properly located underground pit subsequent to its installation by the utility, the customer shall bear the cost of removal and reinstallation, including new service line and retapping of the main, if necessary.

(g) When the meter is to be installed indoors, it shall be located:

- (1) as near as practical to where the service pipe enters the building;
- (2) in a clean, dry, safe place that is:
 - (A) protected from freezing and hot water; and
 - (B) not subject to wide temperature variations; and
- (3) so as to be at all times accessible for:
 - (A) reading;
 - (B) inspection; and
 - (C) removal for testing.

(h) If:

- (1) a customer requests and the utility approves; or
- (2) the utility determines that it is desirable in order to facilitate meter reading;

a remote reading register device may be installed outside the building at an accessible location. - (2) The number and kind of units of service supplied,
- (3) The billing rate code, if any,
- (4) The previous balance, if any,
- (5) The amount of the bill,
- (6) The sum of the amount of the bill and the late payment charge, if any,

- (9) Printed statements and/or actual figures on either side of the bill shall inform the customer of the seventeen (17) day non-penalty period.
- (10) An explanation, which can be readily understood, of all codes and/or symbols shall be shown on the bill.

(B) Delinquencies. (1) A utility service bill which has remained unpaid for a period of more than seventeen (17) days following the mailing of the bill shall be a delinquent bill.

- (2) A utility service bill shall be rendered as a net bill. If the net bill is not paid within seventeen (17) days after the bill is

mailed, it shall become a delinquent bill and a late payment charge may be added in the amount of ten (10) percent of the first three (3) dollars and three (3) percent of the excess of three (3) dollars.

(C) Estimated Billing. A water utility may estimate the bill of any customer pursuant to a billing procedure approved by the Commission or for other good cause, including, but not limited to: request of customer; inclement weather; labor or union disputes; inaccessibility of a customer's meter if the utility has made a reasonable attempt to read it; and other circumstances beyond the control of the utility, its agents and employees. 170 IAC 6-1-14 Billing adjustments

Authority: IC 8-1-1-3; IC 8-1-2-4

Affected: IC 8-1-2-34

Sec. 14. Adjustment of Bills. (A) Adjustments Due to Meter Error. If any service meter shall be found to have a percentage of error greater than that allowed in Rule 9 [170 IAC 6-1-9], the following provisions for the adjustment of bills shall be observed:

(1) Fast Meters. When a meter is found to have a positive average error, i.e., is fast, in excess of two (2) percent, the utility shall refund or credit the customer's account with the amount in excess of that determined to be an average charge for one-half of the time elapsed since the previous test, or one (1) year, whichever period is shorter. This average charge shall be calculated on the basis of units registered on the meter over corresponding periods either prior or subsequent to the period for which the meter is determined to be fast. No part of a minimum service charge need be refunded.

(2) Stopped or Slow Meters. When a meter is stopped or has a negative average error, i.e., is slow, in excess of two (2) percent, the utility may charge the customer an amount estimated to be an average charge for one-half of the time elapsed since the previous test or one (1) year, whichever period is shorter. This average charge shall be calculated on the basis of units registered on the meter over corresponding periods either prior or subsequent to the period for which the meter is determined to be slow or stopped. Such action may be taken only in cases where the utility is not at fault for allowing the stopped or slow meter to remain in service.

(B) Adjustment for Interruption of Service. In the event the customer's service is interrupted for a reason other than the act of the customer or the condition of customer controlled equipment, and the service remains interrupted for more than two (2) days after being reported or found to be out of order, appropriate adjustments or refunds shall be made to the customer. Each company shall file with the commission a tariff detailing the method and amount of refund in such cases.

(C) Other Billing Adjustments. All other billing errors, including incorrect tariff applications, may be adjusted to the known date of error or for a period of one year, whichever period is shorter. (c) If the applicant fails to establish that he or she is creditworthy, under subsection (b), the applicant may be required to make a reasonable cash deposit. Such deposit shall not exceed one-sixth ($\frac{1}{6}$) of the estimated annual cost of service to be rendered to the applicant. If a deposit is greater than seventy dollars (\$70), the utility shall advise the applicant or customer simultaneously with making a demand for a deposit that the applicant or customer may pay such deposit in equal installment payments over a period of no less than eight (8) weeks; service shall be connected upon receipt by the utility of the first such payment.

(d) If the utility requires a cash deposit as a condition of providing service, then it must immediately notify the applicant in writing stating the precise facts upon which the utility based its decision and provide the applicant with an opportunity to rebut such facts and show other facts demonstrating his or her creditworthiness.

- (6) Any deposit made by the applicant, customer, or any other person to the utility (less any lawful deductions), or any sum the utility is ordered to refund for utility service, that has remained unclaimed for one (1) year after the utility has made diligent efforts to locate the person who made such deposit or the heirs of such person, shall be presumed abandoned and treated in accordance with IC 32-9-1.5-20(c)(10) [*IC 32-9 was repealed by P.L.2-2002, SECTION 128, effective July 1, 2002.*].

170 IAC 6-1-16 Disconnection of service; prohibited disconnection; reconnection

Authority: IC 8-1-1-3; IC 8-1-2-4
Affected: IC 8-1-2-4; IC 8-1-2-113

Sec. 16. (a) For disconnection of service upon the customer's request, the customer shall:

- (1) notify the utility at least three (3) days in advance of the day disconnection is desired; and
- (2) remain responsible for all service used and the billings therefor until service is disconnected pursuant to such notice.

Upon request by a customer of a utility to disconnect service, the utility shall disconnect the service within three (3) working days of the requested disconnection date. The customer shall not be liable for any service rendered to the address or location after the expiration of these three (3) days.

(b) A utility may disconnect service without request by the customer and without prior notice only:

- (1) if a condition dangerous or hazardous to life, physical safety, or property exists;
- (2) upon order by any court, the commission, or other duly authorized public authority;
- (3) if fraudulent or unauthorized use of water is detected and the utility has reasonable ground to believe the affected customer is responsible for the use; or
- (4) if the utility's regulating or measuring equipment has been tampered with and the utility has reasonable grounds to believe that the affected customer is responsible for the tampering.

In all other instances, a utility, upon providing the customer with proper notice as defined in subsection (e), may disconnect service subject to the other provisions of this rule.

(c) Except as otherwise provided in subsections (a) and (b), a utility shall postpone the disconnection of service for ten (10) days if, prior to the disconnect date specified in the disconnect notice, the customer provides the utility with a medical statement from

WATER UTILITIES

a licensed physician or public health official that states that disconnection would be a serious and immediate threat to the health or safety of a designated person in the household of the customer. The postponement of disconnection shall be continued for one (1) additional ten (10) day period upon the provision of an additional such medical statement. A utility may not disconnect service to the customer:

- (1) upon his or her failure to pay for:
 - (A) merchandise or appliances purchased from the utility furnishing the water;
 - (B) the service rendered at a different metering point, residence, or location if the bill has remained unpaid for less than forty-five (45) days;
 - (C) services to a previous occupant of the premises to be served, unless the utility has good reason to believe the customer is attempting to defraud the utility by using another name; or
 - (D) a different form or class of utility service;
- (2) if the customer shows cause for his or her inability to pay the full amount due (financial hardship shall constitute cause) and the customer:
 - (A) pays a reasonable portion (not to exceed ten dollars (\$10) or one-tenth (1/10) of the bill, whichever is less, unless the customer agrees to a greater portion) of the bill;
 - (B) agrees to pay the remainder of the outstanding bill within three (3) months;
 - (C) agrees to pay all undisputed future bills for service as they become due; and
 - (D) has not breached any similar agreement with the utility made pursuant to this rule within the past twelve (12) months; provided, however, that the utility may add to the outstanding bill a late payment charge not to exceed the amount set under section 13(b) of this rule, and provided further, that the terms of the agreement shall be put in writing by the utility and signed by the customer and by a representative of the utility and only one (1) late payment charge may be made to the customer under this section; or
- (3) if a customer is unable to pay a bill that is unusually large due to prior incorrect reading of the meter, incorrect application of the rate schedule, incorrect connection or functioning of the meter, prior estimates where no actual reading was taken for over two (2) months, stopped or slow meter, or any human or mechanical error of the utility, and the customer:
 - (A) pays a reasonable portion of the bill, not to exceed an amount equal to the customer's average bill for the twelve (12) bills immediately preceding the bill in question;
 - (B) agrees to pay the remainder at a reasonable rate; and
 - (C) agrees to pay all undisputed future bills for service as they become due;provided, however, that the utility may not add to the outstanding bill any late fee, and provided further, that the terms of agreement shall be put in writing by the utility and signed by the customer and a representative of the utility.

If a customer proceeds with a review under 170 IAC 16-1-5, the utility may disconnect only as provided in 170 IAC 16-1-7.

(d) No utility may disconnect service unless it is done between the hours of 8:00 a.m. and 3:00 p.m., prevailing local time. Disconnections under subsections (a) and (b) are not subject to this limitation. A utility may not disconnect service for nonpayment on any day on which the utility office is closed to the public or after noon of the day immediately preceding any day on which the utility office is not open to the public.

(e) Notice is required prior to involuntary disconnection as follows:

(1) Except as otherwise provided in this article, service to any residential customer shall not be disconnected for a violation of any rule or regulation of a utility or for the nonpayment of a bill, except after seven (7) days prior written notice to the customer by either:

- (A) mailing the notice to the residential customer at the address shown on the records of the utility; or
- (B) personal delivery of the notice to the residential customer or a responsible member of his or her household at the address shown on the records of the utility.

No disconnect notice for nonpayment may be rendered prior to the date on which the account becomes delinquent.

(2) The notice must be in language that is clear, concise, and easily understandable to a layperson and shall state the following in separately numbered large typed or printed paragraphs:

- (A) The date of proposed disconnection.
- (B) The specific actual basis and reason for the proposed disconnection.
- (C) The telephone number of the utility office at which the customer may call during regular business hours in order to question the proposed disconnection or seek information concerning his or her rights.

WATER UTILITIES

(D) A reference to the pamphlet or the copy of the rules furnished to the customer under section 18 of this rule for information as to the customer's rights.

(f) Immediately preceding the actual disconnection of service, the employee of the utility designated to perform such function shall:

- (1) make a reasonable attempt to identify himself or herself to the customer or any other responsible person then upon the premises;
- (2) announce the purpose of his or her presence;
- (3) make a record thereof to be maintained for at least thirty (30) days;
- (4) have in his or her possession information sufficient to enable him or her to inform the customer or other responsible person of the reason for disconnection, including the amount of any delinquent bill of the customer; and
- (5) request from the customer any available verification that the outstanding bill has been satisfied or is currently in dispute pursuant to review under 170 IAC 16-1-5.

Upon the presentation of such credible evidence, service shall not be disconnected. The employee shall not be required to accept payment from the customer or other responsible person in order to prevent the service from being disconnected. The utility shall notify its customers under section 18 of this rule of its policy with regard to the acceptance or nonacceptance of payment by such employee and shall uniformly follow such policy without discrimination. When the employee has disconnected the service, he or she shall give to a responsible person at the customer's premises or, if no one is at home, shall leave at a conspicuous place on the premises a notice stating that service has been disconnected and stating the address and telephone number of the utility where the customer may arrange to have service reconnected.

(g) A utility may charge a reasonable reconnection charge, not to exceed the charge approved by the commission in the utility's filed tariffs. A utility shall inform its customers of the reconnection fee under section 18 of this rule. If the utility disconnects service in violation of this rule, the service shall immediately be restored at no charge to the customer. The utility must reconnect the service to the customer as soon as reasonably possible but at least within one (1) working day after it is requested to do so; provided, however, that the utility shall not be required to reconnect the service until:

- (1) the conditions, circumstances, or practices that caused the disconnection have been corrected;
- (2) payment of all delinquent charges owed the utility by the customer and any deposit authorized by this rule has been made; and
- (3) a responsible person is present in the premises to see that all water outlets are closed to prevent damage from escaping water.

- (9) An affidavit from an officer of the utility attesting to the veracity of the statements and information submitted under this subsection.
- (10) When the petition constitutes an application to change an existing DSIC, a statement describing how the utility will satisfy any outstanding reconciliation requirement for its current DSIC.
- (11) A statement that the project costs, for which recovery is sought, represent an investment by the utility and not another funding source such as a grant, developer contribution, or transportation department reimbursement.

170 IAC 6-1.1-8 Reconciliation procedure

Authority: IC 8-1-31-17

Affected: IC 8-1-2; IC 8-1-31

Sec. 8. (a) A utility authorized to implement a DSIC shall file with the commission, no later than thirty (30) days after the expiration of each twelve (12) month period in which the DSIC rate was in effect, a report that reconciles the difference between the

DSIC revenues and the DSIC costs. The utility shall serve a copy of the report simultaneously on the office of the utility consumer counselor. Within fifteen (15) days of service, the office of the utility consumer counselor shall submit its comments to the commission and serve a copy on the utility. Upon review of the utility's report and the office of utility consumer counselor's comments, the commission may, at its discretion, convene a hearing after notice to adjust the DSIC to reconcile over recovery or under recovery of the underlying DSIC costs.

(b) In the event the utility is later authorized to change its DSIC, then the annual reconciliation shall be twelve (12) months following the authorization of the change in the DSIC, with the first reconciliation also covering the period between the last reconciliation of the previously approved DSIC and authorization to change the DSIC (the "interim period"). Reconciliation for the interim period shall use the DSIC revenues and DSIC costs associated with the DSIC in effect at the time.

(c) In the event that a utility files revised rate schedules, the commission's order will reset the DSIC and create new basic rates and charges. Upon issuance of the order, the utility shall file the reconciliation report covering previously unreconciled periods with the commission within three (3) months. The report must be completed as follows:

(1) The reconciliation report shall use the DSIC revenues and DSIC costs associated with the DSIC in effect at the time.

(2) An over or under recovery shall be shown as an addition to or reduction from DSIC costs included in the utility's first DSIC filing following implementation of the new basic rates and charges.

Sec. 30. A determination shall be made of the number of lots to be served by the main extension. The determination may include only lots which directly abut the main extension between its original beginning and its original end point. If any part of the main extension is located within an area platted or to be platted, the number of lots shown within the plat to be served shall be included in the determination. If any part of the main extension is located in an unplatted area, the number of lots to be included shall be determined by dividing the total frontage of the main extension within the unplatted area on either or both sides of the public thoroughfare or easement in which the main is located by one hundred (100) feet and rounded to the nearest whole number of lots, provided either or both sides are available for future development and not restricted against usage because of limited access or other reasons. The determination of the number of lots for a particular extension may include a combination of platted and unplatted lots as defined in this section. Any further main extension subsequently connected to the original main extension shall, for all purposes under this rule, constitute a separate main extension. 170 IAC 6-1.5-31 Main extension cost

Authority: IC 8-1-1-3; IC 8-1-2-4; IC 8-1-12

Affected: IC 8-1-12

Sec. 31. (a) The cost of the main extension may, as determined by the utility, be either:

(1) the computed cost based on the average costs for similar main extensions experienced by the utility during its preceding fiscal year, plus or minus any amount necessary to adjust for known cost increases or decreases;

(2) the estimated cost of the extension; or

(3) the actual cost of a developer-installed extension.

(b) In the absence of representative cost data for the previous year for any size or type of main or for any special construction, or for any other facility involved in a main extension, the cost shall be the utility's best estimate of the cost of the main, special construction, or related facilities based upon current available information.

(c) If the cost of the main extension is computed or estimated under subsection (a)(1) or (a)(2), it shall be based on an eight (8) inch main unless the utility determines that a larger or smaller main is reasonably necessary to serve the applicant, including fire protection service, in which event the cost, computed or estimated, shall be based on the size of main determined reasonably necessary.

(d) If the utility's future extension plans require a larger main than is reasonably necessary to serve the applicants and prospective customers, the difference in the cost for the larger main size and increased material and installation cost, if any, shall be borne by the utility.

(e) The computed or estimated cost may be adjusted to the actual cost by the utility, in which event the actual cost as finally determined shall constitute the cost of the main extension. If the main extension agreement provides for the adjustment of the computed or estimated cost of the main extension to the actual cost, the adjustment shall be made upon completion of the main extension. If the actual cost of the extension is less than the computed or estimated cost, the utility shall refund the difference to the original depositor as soon as the actual cost has been determined. If the actual cost of the extension exceeds the computed or estimated cost, then the utility shall bill the original depositor for, and that depositor shall pay, the difference between the computed or estimated cost and the actual cost.

(f) If the utility determines that a main larger than eight (8) inches is reasonably necessary to serve the domestic and fire protection requirements of the applicant, and those requirements are significantly in excess of the requirements of the other applicants or the prospective customers along the intervening route of the main, the cost of the main extension or deposit for other applicants or subsequent connector's fee for the prospective customers shall be based on the smaller size main that the utility has determined is adequate to meet the requirements of the other applicants or the prospective customers along the intervening route. Sec. 32. The cost per lot shall be determined by:

- (1) the total number of lots to be served by the main extension divided into the cost of the main extension; or
- (2) the cost of the main extension shall be divided proportionately on the basis of respective lot frontage for all lots to be served by the main extension.

Authority: IC 8-1-1-3; IC 8-1-2-4; IC 8-1-12

Affected: IC 8-1-12

Sec. 33. (a) The utility shall file with the commission, for approval, its choice of the following options with appropriately revised rules:

- (1) For the main extension, the applicant shall be required to pay the cost of the main extension, and the full gross-up state and federal taxes associated with the cost of the extension and the applicant shall receive refunds as provided in sections 36 through 37 of this rule.
- (2) For the main extension, the applicant shall be required to pay the cost of the main extension exclusive of the tax associated with the main extension, and the applicant shall receive refunds as provided in sections 36 through 37 of this rule.
- (3) For the main extension, the applicant shall be allowed the option of paying the cost of the main extension and full gross-up state and federal taxes associated with the cost of the main extension, and the applicant shall receive refunds as provided in sections 36 through 37 of this rule, or shall pay the cost of the main extension exclusive of the tax associated with the main extension and the applicant shall forfeit all rights to immediate revenue allowances and to refunds, except for subsequent

connector's fees.

(b) If the utility desires to change its option after initial filing, the utility shall submit its requested revisions to the commission for approval. 170 IAC 6-1.5-34 Total required deposit

Authority: IC 8-1-1-3; IC 8-1-2-4; IC 8-1-12

Affected: IC 8-1-12

Sec. 34. (a) In the case of a residential real estate development, immediate revenue allowance may not be deducted from the cost of the main extension in determining the amount of the total required deposit, except for those residential dwelling units, if any, where construction has commenced above the first floor level.

(b) In the case of a commercial or industrial real estate development, immediate revenue allowance may not be deducted from the cost of the main extension in determining the amount of the total required deposit, except where building construction has commenced and pertinent data, such as customer types, service pipe, metering arrangements, and water demands, have been furnished to the utility, to allow the utility to determine the estimated annual revenue from that development.

(c) The total required deposit for a main extension may either be made in a cash payment, or it may be secured by an irrevocable letter of credit acceptable to the utility and issued by a national banking association or a bank chartered under the laws of the state. The deposit may also be secured in any other manner which is mutually acceptable to the parties and which guarantees payment of the deposit immediately upon completion of the main extension.

(d) If permitted by the utility, the main extension may be installed by the developer or the developer's contractor according to the extension and installation policies of the utility, and the actual cost of the developer-installed extension shall be considered the total required deposit.

(e) A utility may allocate, or permit original depositors to allocate, the total required deposit on the basis of the number of lots, the respective lot frontage, or any other basis mutually acceptable to the original depositors. 170 IAC 6-1.5-35 Subsequent connector fee

Authority: IC 8-1-1-3; IC 8-1-2-4; IC 8-1-12

Affected: IC 8-1-12

Sec. 35. (a) Within ten (10) years after the completion date of the main extension, a utility shall not permit a subsequent connector to connect to a main extension until after the subsequent connector has paid the required subsequent connector's fee to the utility.

(b) Applicants for service connections for lots in subdivision and tract developments which are included in the original depositor's main extension agreement, are not required to pay a subsequent connector's fee, unless otherwise specifically provided for in the main extension agreement.

(c) If a prospective customer with frontage land that was unplatted on one (1) or both sides of the street at the time the main extension was installed later subdivides this frontage prior to the expiration of the ten (10) years after the completion date of the main extension in such a manner that some or all lots will not require service directly from that main extension, the customer is considered to have requested a lateral extension from that main extension to serve the customer's land. The utility, in that case, shall collect from the prospective customer prior to installing the requested lateral main extension, a subsequent connector's fee for each equivalent lot of the frontage land used in determining the main extension cost per lot and which will not be served directly by the original main extension. 170 IAC 6-1.5-36 Refunds

Authority: IC 8-1-1-3; IC 8-1-2-4; IC 8-1-12
Affected: IC 8-1-12

Sec. 36. (a) Refunds shall be paid for a period of ten (10) years after the completion date of the main extension to the original depositor in proportion to the respective deposits, unless the original depositor for the main extension forfeited all rights to refunds, except subsequent connector's fees, as provided in section 33(a)(3) of this rule.

(b) However, no refunds shall be required to be made by the utility until the number of customers actually connected to the main extension equals the number of applicants for which an immediate revenue allowance was included in computing the total required deposit for the main extension. The refunds shall be paid annually or more frequently at regular intervals at the discretion of the utility.

(c) Total refunds to any original depositor shall not exceed the amount of the original deposit except in the case of a phased residential real estate development. In this situation the preliminary plat must be submitted to the utility at the time of the first request for a main extension. During the ten (10) year period beginning with the completion date of the first main extension, the amount of any refunds generated in excess of the deposit made on any phase of the development must be applied against the deposit made for any other phase of the development, so long as the total amount of refunds to the original depositor shall not at any time exceed the total amount of his deposits during the period. The utility shall not require any subsequent connector's fee which is in excess of the unrefunded balance of the aggregate of deposits received from all original depositors.

(d) The refund shall be made by mailing the payment to the original depositor's last known address as shown on the books and records of the utility. Any refund distribution which cannot be returned to an original depositor after the refund becomes due and payable must be reported as required by IC 32-9-1-42 [Repealed by P.L.31-1995, SECTION 9, effective July 1, 1996.]. Any deposit which is not subject to refund because of the running of the ten (10) year period as provided in section 36 of this rule, shall be transferred by the utility to contributions in aid of construction. If the original depositor for a main extension forfeits all rights to a refund, except for subsequent connector's fees as provided in section 33(a)(3) of this rule, the payment must be included in contributions in aid of construction, and the associated taxes shall be deducted from contributions in aid of construction. All other deposits must be held as customers' advances for construction until returned to the original depositor or be reported as required by IC 32-9-1-36 [Repealed by P.L.31-1995, SECTION 9, effective July 1, 1996.]. Affected: IC 8-1-12

Sec. 40. (a) A utility may require a special contract when:

(1) the requested main extension is of such length and the prospective business to be developed by it is so meager as to make it doubtful whether the business from the extension would ever pay a fair return on the utility investment involved in such extension;

(2) the prospects are that the patronage and demand will not be of such permanency as to warrant the capital expenditure involved;

(3) there are industrial installations requiring extensive water utility investment and where the demand for water service is expected to be slight, irregular, or of unknown quantity; or

(4) there are other abnormal or extraordinary circumstances.

(b) The utility and the applicant requesting the extension may enter into a special contract establishing the terms and conditions on which the extension will be made. In the event they are unable to agree on the terms and conditions, the matter, including the contract embodying the terms and conditions, shall be submitted to the commission for determination. *(Indiana Utility Regulatory Commission; 170 IAC 6-1.5-40; filed Dec 5, 1990, 3:35 p.m.: 14 IR 565; readopted filed Jul 11, 2001, 4:30 p.m.: 24 IR 4233; readopted filed Apr 24, 2007, 8:21 a.m.: 20070509-IR-170070147RFA; readopted filed Aug 2, 2013, 2:16 p.m.: 20130828-IR-170130227RFA; readopted filed Apr 11, 2019, 9:04 a.m.: 20190508-IR-170190136RFA)*
