SUMMARY/RESPONSE TO COMMENTS

The Natural Resources Commission (commission) requested public comment on the proposed interim rule from July 17, 2024, through August 16, 2024. The comments received the commission's responses to the comments are summarized as follows:

Comments on repealing the special antlerless season under [312 IAC 9-3-4\(h\)](#): Comments were received in support of and opposition to keeping the special antlerless only season that began December 26 and ends the first Sunday in January in counties with an antlerless quota of at least four (4).

Response: The purpose of the special antlerless season was to significantly increase the harvest of antlerless deer, but research found that individuals harvest antlerless deer later in the season in counties where the special antlerless season occurs. A 2021 survey of individuals found that twenty-four percent (24%) of respondents hunted during the special antlerless season during the previous calendar year, and thirty-eight percent (38%) of respondents hunted during the special antlerless season during the previous five (5) years, see the 2020 Indiana DNR Deer Report. When asked what the general level of opposition or support was for the special antlerless season, the department found that forty-three percent (43%) of individuals support the special antlerless season to some degree, and twenty-seven percent (27%) opposed the special antlerless season to some degree. Therefore, because of the split interest in the special antlerless season, the low turnout during the special antlerless season, the ineffectiveness of the special antlerless season to change the deer harvest, and the conflict with individuals who participate in the special antlerless season, the department proposes the removal of the season.

Comment opposed to the current deer firearm season dates. One (1) comment was received which suggested changing the start date of the deer firearms season in [312 IAC 9-3-4\(e\)](#).

Response: The department did not propose a change to the dates of when the firearms season begins and ends and is not proposing to change these dates at this time.

Comment opposed to a deer hunting season. One (1) comment was received which requested an open season for deer that would last the entire year.

Response: Under the Indiana Code, the division of fish and wildlife (division) is required to provide for the management and survival of deer in Indiana. The division is committed to managing the white-tailed deer resource for future generations by balancing ecological, recreational, and economic benefits. Proper management of the deer resource requires the cooperative actions of the division and the citizens of Indiana to produce healthy deer in a healthy environment as an indefinitely renewable resource. Within the above constraints, the division is

committed to maximizing the public's range of choices for both consumptive recreation through hunting and nonconsumptive recreation by viewing, photographing, and appreciating the deer resource. The goal of the division's deer management program is to maintain a healthy deer herd at a level that provides satisfactory hunting and viewing opportunities while minimizing vehicle accidents involving deer, agricultural crop damage, and other conflicts between deer and humans. Deer management in Indiana is a dynamic process of repeated surveys of farm operators, deer hunters, and the public, as well as adjusting deer population levels to comply with the evolving desires of residents. Deer control permits are available to landowners, farmers, and others experiencing economic loss due to damage caused by deer outside the deer hunting season. A deer control permit is free of charge and may be requested when damage begins to occur under [312 IAC 9-10-25](#).
