(b) Before sending a sample from a horse to a testing laboratory, the commission veterinarian or a designated employee shall divide the specimen into two (2) parts.

(c) The commission veterinarian shall collect a minimum of fifty (50) milliliters of urine which shall be divided into two (2) portions, one (1) of which shall be forwarded to the primary laboratory. The primary testing laboratory shall receive a minimum of fifty (50) milliliters of urine. The commission veterinarian shall collect a minimum of thirty (30) milliliters of blood which shall be divided into two (2) portions, both of which shall be forwarded to the primary laboratory. If an insufficient volume of urine is obtained, the trainer and owner are not entitled to a split sample.

(d) If the split sample testing laboratory determines that there is insufficient sample volume to make a specific identification of the sample contents, or if an act of God, power failure, accident, labor strike, or any other event beyond the control of the commission or its representatives prevents the split sample from being tested, then the results of tests performed by the primary laboratory shall be considered prima facie evidence of the condition of the horse.

(e) The commission veterinarian shall retain the part of the urine **and blood** specimen that is not sent to the primary laboratory. ~~The primary laboratory shall retain a portion of the blood specimen on all positive tests.~~

(f) If the retained part of a specimen is sent for testing, the commission veterinarian ~~or primary laboratory~~ shall arrange for the transportation of the specimen in a manner that ensures the integrity of the sample.

If the result of the initial test on a specimen is positive, the commission veterinarian ~~or primary laboratory~~ may discard the retained part of the specimen after the expiration of the period during which an owner or trainer may request the retained part be sent for split testing.

(c) The identity of the drug or drug metabolites shall be revealed to the split sample laboratory. Communication between the primary and split sample laboratory is limited to the exchange of the analytical method and the threshold level used to confirm the drug's identity.
