TITLE 312 NATURAL RESOURCES COMMISSION

LSA Document #04-152(E)

DIGEST

Temporarily amends 312 IAC 18-3 concerning entomology and plant pathology to regulate the emerald ash borer (*Agrilus planipennis*) as a pest or pathogen and to provide standards for quarantine in Jamestown Township in Steuben County and Clay Township in LaGrange County, which is infested with the species. Repeals LSA Document #04-150(E), printed at 27 IR 3088. Effective June 2, 2004.

SECTION 1. (a) Emerald ash borer (Coleoptera: Buprestidae: *Agrilus planipennis*) is a pest or pathogen and is regulated under this document.

(b) These terms apply to this document and are in addition to definitions contained in 312 IAC 1 and 312 IAC 18-1:

- (1) “Certificate of inspection” means a document issued or authorized to be issued by the state entomologist to allow the movement of a regulated article to any destination. A certificate may be in any form approved by the state entomologist for this purpose, including a phytosanitary document or multiple use quarantine certificate.**
- (2) “Compliance agreement” means a written agreement between the department or the U.S. Department of Agriculture and another person that authorizes the movement of regulated articles under this SECTION and other stated conditions.**
- (3) “Infested area” means a site where the emerald ash borer is present or where circumstances make it reasonable to believe that the ash borer is present.**
- (4) “Inspector” means a division inspector or a person authorized by the U.S. Department of Agriculture authorized to enforce this SECTION.**
- (5) “Move” means to ship, offer for shipment, receive for transportation, transport, carry, or allow to move or to ship.**

(c) The following are regulated under this document:

- (1) Jamestown Township, Steuben County; and**
- (2) Clay Township, LaGrange County.**

(d) The following items are regulated articles:

- (1) The emerald ash borer in any living stage of development.**
- (2) Any ash tree (*Fraxinus* spp.), including nursery stock.**
- (3) A limbs [*sic.*], stump, branch, or debris of at least one (1) inch in diameter of an ash tree.**
- (4) An ash log or untreated ash lumber with bark attached.**
- (5) Composted and uncomposted ash chips and composted and uncomposted ash bark chips at least one (1) inch in diameter.**
- (6) An article, product, or means of conveyance reasonably determined by the state entomologist to present the risk of spread of the emerald ash borer.**
- (7) Cut firewood of any species originating from a regulated area.**

(e) A person must not move a regulated article outside an infested area except under the following conditions:

- (1) An inspector issues a certificate of inspection following a thorough examination of the regulated article and any treatment method. The certificate must be properly supported by a determination by the inspector, or by a grower or shipper authorized to conduct an inspection under a compliance agreement, that no life stage of emerald ash borer is present. A certificate may be conditioned upon the completion of treatments administered**

under methods approved by the state entomologist or by a United States federal officer authorized by the state entomologist.

(2) A certificate of inspection is attached to any regulated article or to a shipping document that adequately describes the regulated article. The certification must remain attached until the regulated article reaches its destination.

(f) A person must not move a regulated article originating outside an infested area, through a county regulated under subsection (c), without a certificate of inspection for the emerald ash borer, except under the following conditions:

(1) From September 1 through April 30, or when the ambient air temperature is below forty (40) degrees F., if the person does not stop except to refuel or for traffic conditions.

(2) From May 1 through August 31 when the temperature is forty (40) degrees F. or higher if the article is shipped in an enclosed vehicle or is completely enclosed by a covering adequate to prevent access by the emerald ash borer.

(3) The point of origin of the regulated article is indicated on the bill of lading or shipping document.

(4) The regulated article is moved within Indiana by approval of the state entomologist for scientific purposes.

(5) The article is not combined or commingled with other articles so as to lose its individual identity.

(g) A regulated article originating outside a regulated area that is moved into a county regulated under subsection (c) and exposed to potential infestation by the emerald ash borer is considered to have originated from a regulated area. A person must not move the regulated article from the regulated area except under subsection (e).

(h) A person must not move a regulated article from an infested area through any nonregulated area to a regulated destination without a certificate of inspection for emerald ash borer, except under the following conditions:

(1) From September 1 through April 30, or when the ambient air temperature is below forty (40) degrees F., if the person does not stop except to refuel or for traffic conditions.

(2) From May 1 through August 31 when the temperature is forty (40) degrees F. or higher, if the article is shipped in an enclosed vehicle or completely enclosed by a covering adequate to prevent the escape of any emerald ash borer.

(3) The county and state of origin and the final destination of the regulated article is indicated on the bill of lading or shipping document.

(i) The bill of lading or shipping document accompanying any shipment of regulated articles in Indiana must indicate the county and state of origin of the regulated articles.

(j) A person who moves a regulated article in violation of this SECTION must move or destroy the article, at the person's or owner's expense, as directed by the state entomologist.

(k) The state entomologist may issue a special permit for the movement of the emerald ash borer into or within Indiana for research purposes. The permit may, by express language, exempt the permit holder from conditions of this document.

(l) Uncomposted ash chips and uncomposted ash bark chips no larger than one (1) inch in diameter are exempted from the requirements of this document.

SECTION 2. LSA Document #04-150(E) IS REPEALED.

SECTION 3. SECTION 1 of this document expires on April 1, 2005.
